HINDI
ENGLISH

CERTIFICATIONS

- Course On Computer Concepts (CCC)
- Full Stack Web Development

SUMMARY

"With a background in electronics assembly and testing, I'm ready to transition into full-stack development, leveraging my analytical mindset, attention to detail, and problem-solving skills. Committed to staying current with industry trends, I aim to bring adaptability and a passion for coding to deliver innovative solutions across both front and back-end technologies. Seeking a challenging role where I can apply my diverse skill set to create user-centric designs and responsive interfaces."

EXPERIENCE

Himalayan Hybrid Power Technologies Pvt Ltd. | Trainee Engineer (Power Electronics)

Dehradun, India | Nov 2021-Aug 2022

- Conducted comprehensive testing of PCBs, connectors, and power supplies, and actively participated in the design of circuits to meet project specifications.
- Facilitated inspection processes, meticulously designing new products and components prior to the initiation of the design phase.
- Executed final designs and performed in-depth fault-finding in PCBs and circuits, ensuring the delivery of high-quality and reliable products.

RMSI PVT. LTD. | Junior Engineer (GIS)

Dehradun, India | Jun 2021-Sep 2021

- Demonstrated a deep understanding of map specifications, ensuring accuracy and precision in mapping projects.
- Played a key role in a collaborative project with Cartopia and Coronardo Software for Tomtom Navigation, contributing to the enhancement of navigation systems through meticulous mapping.
- Consistently achieved and surpassed daily production targets set by management, showcasing efficiency and dedication in meeting project milestones.

Napino Auto & Electronics Ltd. | Diploma Engineer Operating Trainee

Haridwar, India | Aug 2020-May 2021

- Implementing the 5S methodology daily as part of the pre-work routine.
- Proficiently assembled and tested electronics components on PCB boards, ensuring the quality and functionality of the final products.
- Conducted meticulous hand soldering, testing, and troubleshooting on panels, demonstrating precision and attention to detail.
- Operated advanced machinery including PCB Separation, In-Circuit Testing (ICT), and Wave Soldering machines, contributing to the efficient and high-quality production processes.
